About Bristol Mums

Here at Bristol, the "Birthplace" of the Hybrid Korean Chrysanthemum, which proved such a vital factor in the complete renaissance of the old-fashioned hardy mum, the watchword is always "Better Plants for your Hardy Garden."

This in a large way is why the "Hardy Chrysanthemum" now enjoys a gorgeously magnificent season all its own; bringing a new wealth of color to your garden long before and for weeks and weeks after frost has largely destroyed all other hardy flowers.

We supply potted plants, from 2¼" deep pots, ideal for your purpose. Years of experience have shown these to be best for planting. All are pre-sterilized with sodium selenate, mainly to combat leaf nematode. We plant out close to 40,000 plants each year, all from pots if possible.

Remember Bristol for the Best in Mums!
